Each gender of each pathway will be ranked on their own sheet for 4 total ranking sheets (Men/Women and A/B) to compare all eligible athletes using similar ranking scales and equations for their individual eligibility pathway and gender. WSPL Ranks and Points will be recorded as of April 4, 2027 Foundational, Competition/Unique/Creative skills will be calculated based on skill difficulty and execution as submitted within the athlete application utilizing the technical experts input, and video review to compare to the submitted skills chart. Seasonal Progression will record the increase (improvement) of skill based on difficulty and execution of the newly learned skills from each athlete during the 2026/27 season.	
Team Selection Process		
Selection Committee Team Selection	Regardless of the pathway (A or B), all eligible and ranked athletes will be considered by the selection committee for National Team positions, from highest to lowest ranking score on a single sheet per gender that merges A and B pathways. Any gaps or discrepancies between the rankings of the A and B pathways will be discussed by the selection committee during the selection process. All athletes in order of their ranking will be discussed based on the following considerations until the maximum team size or no other eligible athletes are left. a) individual athlete pathway; b) past competitive performances; c) current competitive skill level relative to international standards; d) progression trajectory; e) implementation of training and competition plans; f) Elite Performance Characteristics; g) long-term performance potential; and h) overall team composition. Elite Performance Characteristics: The athlete's implementation of and commitment to their on- and off-snow training plan (including attendance at team-organized sessions, warm-ups, cool-downs, and recovery sessions); the athlete's ability to identify and actively prioritize a plan to close performance gaps and build on strengths; and the athlete's contribution to a positive, values-based team environment.
